### Job Application for Middle C# Engineer

Dear Constructor Group Hiring Team,

My name is Reinis. Right now I am pursuing a Master's degree in Computer Science at Uppsala University in Sweden, and I am currently doing my Master's thesis at Voi Technology AB. Since my Master's studies are soon coming to an end, I am looking for new work opportunities, mainly in Germany. I noticed this C# Developer position at Constructor Group, and I thought that this position sounded like a good fit for me, so I would very much appreciate it if you considered my application for it.

Recently for my Master's studies I have taken more of a data science and machine learning route to expand my knowledge, but otherwise I have previous professional experience working as a full-stack Web developer with more focus on the backend where I worked on developing and integrating various internal and external services / REST APIs and both internal and consumer-facing Web apps. I have more professional experience in C# and the .NET / .NET Core ecosystem, as well as Python. I also have experience with several other technologies and tools such as JavaScript (Angular, Vue.js, Node.js, TypeScript, also some React.js at a hobby level), Haskell, Erlang, SQL (mostly PostgreSQL, Oracle PL/SQL, Snowflake), Redis, Google Cloud Platform (GCP), Docker, Ansible, Git, GitHub, Bash scripts, Jenkins, RabbitMQ and others, and I am always very much willing to learn more. I am familiar with the Agile methodology, CI/CD and DevOps.

I work effectively both independently and as part of a team, and I am fluent in English. Please see my résumé and my portfolio page at https://reiniss.github.io/ for more information on my previous experience and achievements.

Thank you for considering my application. I am excited about the opportunity to bring my skills and expertise to the Constructor Group team. Please let me know if you have any questions or require further information.

Best wishes,

**Reinis Šestakovskis**
