I am a software engineer / full-stack Web developer from Latvia. I also dabble in subjects such as machine learning, data science and Web design. My mission is to build a better world for tomorrow. Always open to new challenges and new things to learn.

WORK EXPERIENCE

DEC 2017 – NOW
Programmer, LLC "ZZ Dats"

Worked on several projects for the public sector (government and municipality institutions) by being a part of the development team for several new and important Web applications and systems.

EDUCATION

SEPT 2016 – JUN 2020
Bachelor of Natural Sciences in Computer Science, University of Latvia

Main topics: Computer science, software engineering, continuous and discrete mathematics.
Thesis: Music audio reconstruction using machine learning

SEPT 2016 – JUN 2018
First Level Professional Education Diploma and "Programmer" Qualification, University of Latvia

Main topics: computer system architecture, computer networks, software engineering, web technologies, databases, Maths.

SEPT 2013 – JUN 2016
Secondary education diploma, Riga State Gymnasium No. 1

Studied in the Maths, English and Physics study programme.
